Dear John,

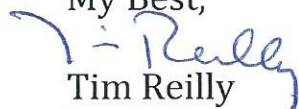

I have to say I am impressed. I tested the exit sign you manufacture and am stunned with the results. After powering it on for just an hour, I turned off the power to see how long the sign would remain illuminated. After 9 hours it was still very visible in the dark! As the principal of 1048 students, safety is always my top concern. Knowing that in the case of emergency, the exit signs will be visible for hours and hours gives me great peace of mind.

In addition, I can already think of hundreds of ways to reallocate the man-hours we spend replacing exit sign batteries and the signs themselves. (My plant manager will not be surprised that I have better uses of his time!)

I look forward to replacing all of our exit signs here at St. Ignatius School and Parish. I really think you have opened the door to increased safety for all, and if that was not enough, the long term cost saving that is impossible to deny.

Thanks you and congratulations!

My Best,

Tim Reilly

Principal

St. Ignatius School
