

JONES LANG
LASALLE®

To whom it may concern:

While Facility Manager at Alcon Pharmaceuticals for Jones Lang LaSalle, I purchased new photoluminescent and Hybrid Electric LED Exit Signs from Hybrid Exit Signs to replace our incandescent Exit Signs. Both the photoluminescent and Hybrid Electric LED Exit Signs were tested for brightness. The signs were highly visible even at 100ft in the dark and they lasted for hours. The Hybrid Electric LED Exit Signs were placed in locations not exposed to high concentrations of light. They were an exciting new technology. Other benefits associated with the installation included: savings in maintenance cost and testing, no more battery backup replacements, and energy savings.

Sincerely,
Bruce Norris, RMS,
Former Facility Manager
Jones Lang LaSalle
